HOTTER THAN EVER

NEW

HOTTER THAN EVER   

INNOVA

INNOVA is a line of confectionery shop display cases, where an innovative system of opening the front glass pane was applied for the first time. **We present their new design in the following variants: BAIN-MARIE, HOT and HALF OPEN.** For in-line set-up or to be used as separate modules. Now with Innova you can implement any concept.

Innovative front pull-out system with electromagnetic lock.

All double glazed units are made of low emission glass with argon filling.

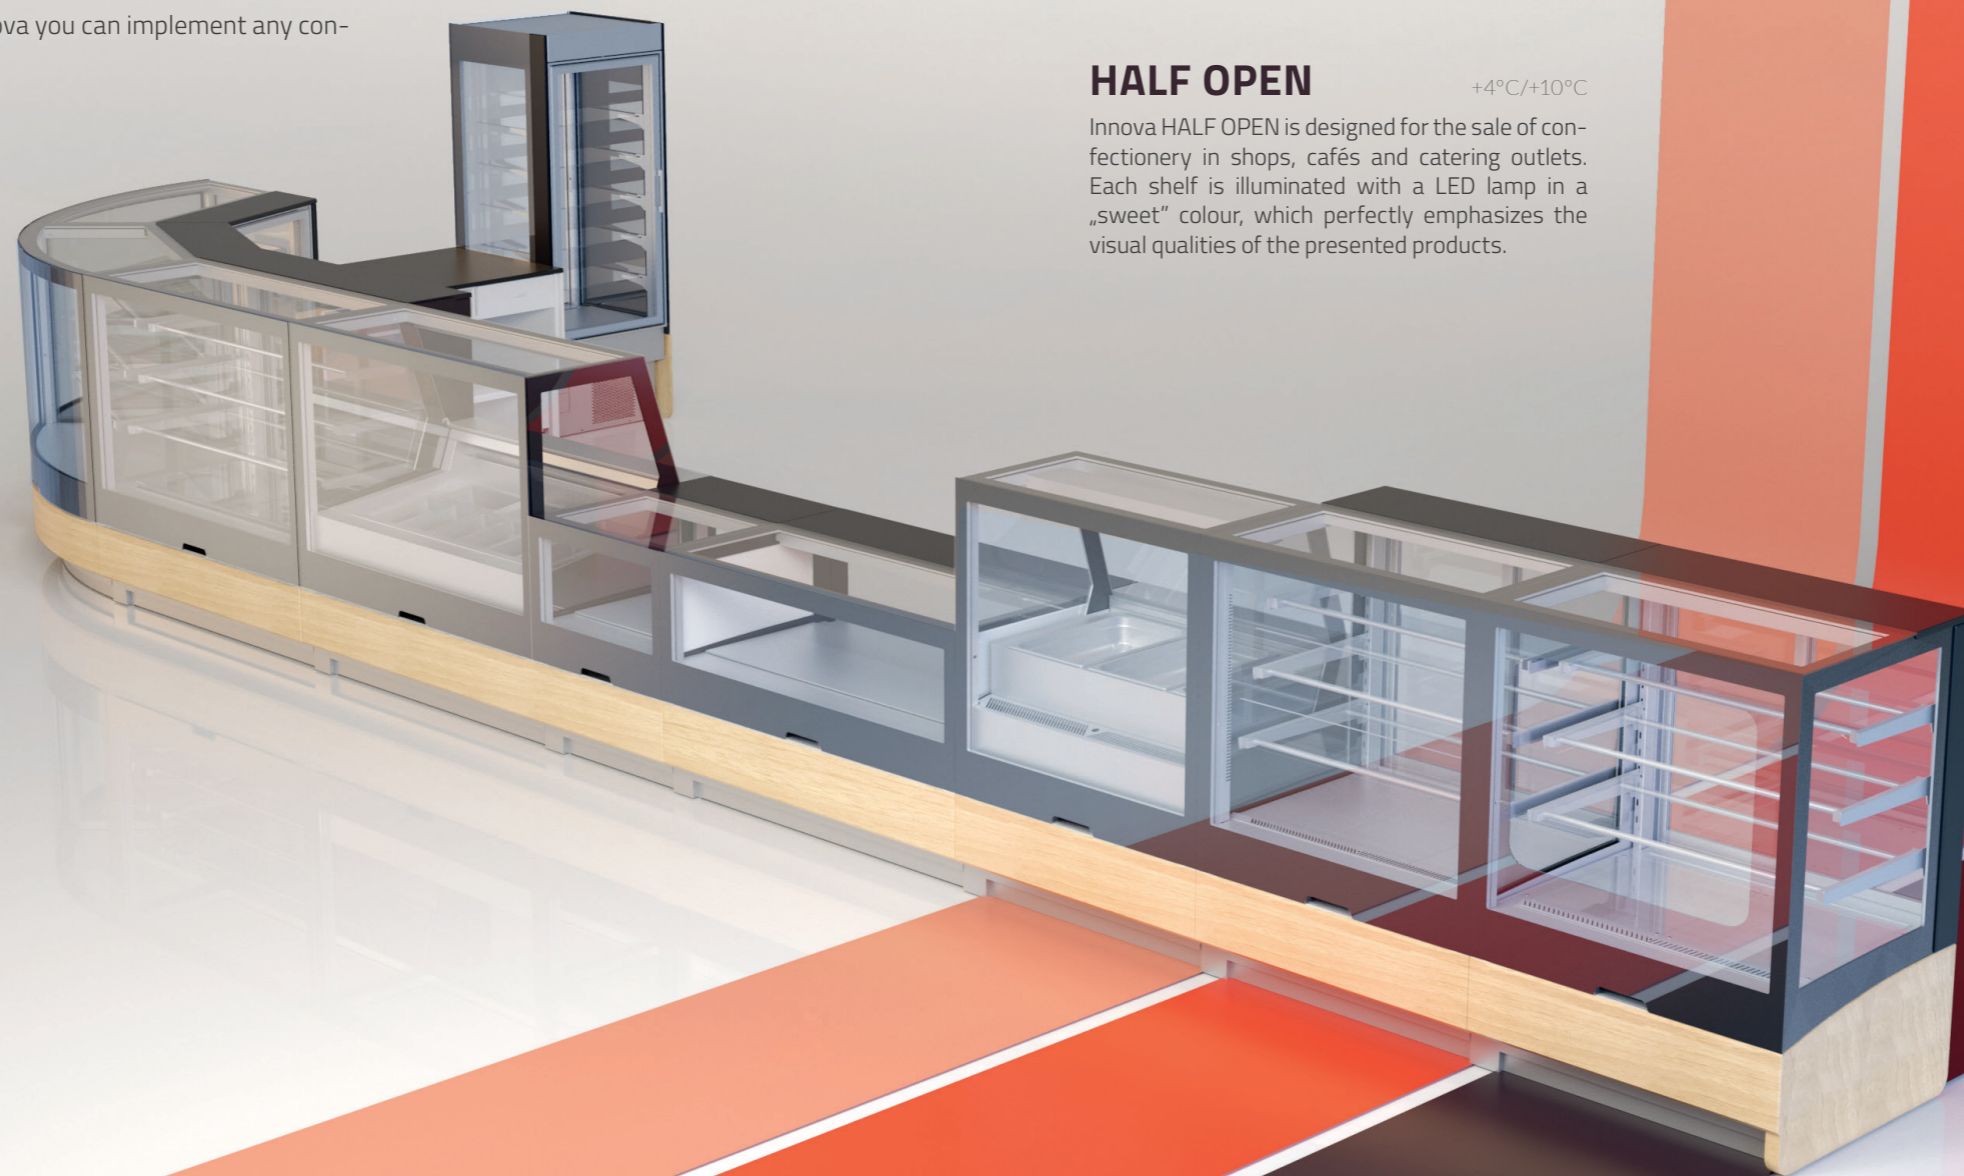

Innovative, energy-efficient LED lighting.

Easy to clean in hard-to-reach areas and ergonomic design.

Refrigeration system based on an eco-friendly, natural refrigerant R290.

BAIN-MARIE +30/+85°C

Innova in the BAIN-MARIE variant is an optimal solution for hotel restaurants, employee canteens and self-service bars. It will fit perfectly into any interior with a modern decor.

HOT +30/+70°C

Innova HOT is the perfect choice for modern sales concepts, where the offer is based on breakfast and lunch product-range and „food to go“ snacks.

HALF OPEN +4°C/+10°C

Innova HALF OPEN is designed for the sale of confectionery in shops, cafés and catering outlets. Each shelf is illuminated with a LED lamp in a „sweet“ colour, which perfectly emphasizes the visual qualities of the presented products.
